Experience the Darlly difference

With over 25 years of experience, Darlly is one of the largest filtration manufacturers in the world. Darlly offers a wide variety of pool, spa and drinking water filter cartridges for all your needs.

Spa-Craft has been an exclusive distributor of Darlly filter cartridges for over a decade supplying the Australian & New Zealand pool and spa trade.

SPA-CRAFT
POOL & SPA EQUIPMENT

What is Microban?

Microban is an antimicrobial blend that is added to cartridge filters to prevent/slow down the growth of harmful microorganisms. The Microban blend is great at keeping bacteria, algae and mould from growing on your cartridge extending its lifespan and filtration quality.

A microban filter will stand out with its unique blue coloured filter media.

701mm - 800mm	15-16
801mm - 900mm	16

How to identify your pool/spa filter cartridge

A Measure the outside diameter of the cartridge. (+/- 1mm).

B Measure the overall length of the cartridge (+/- 1mm) including the end caps. Do not include any handles, strings, etc. A more accurate measurement is made by measuring through the centre of the cartridge when possible.

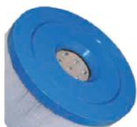

C If the top and/or bottom is open, measure the inside diameter of the opening (+/-1mm). If the end cap is closed make note of it's identifying features (i.e. Handle, etc).

D Make note of the maufacturer (OEM) and model number of the filter into which the replacement cartridge will be installed.

E Take note whether or not there is a centre cone. Also count the number of pleats (+/-2).

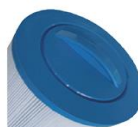

The replacement cartridges catalogue is divided into two sections. Dimensional and by pool/spa manufacturer. The cartridges are listed alphabetically by original manufacturer, and then each cartridge for that manufacturer is listed from the smallest O.D. (outside diameter) to the largest, then by overall length, top (measurement of handles, etc), bottom diameter, and description (manufacturer).
